Born on 24th April, 1993.

## EXPERIENCE

11/2013 - CURRENT

**CONNECTMEDICA SP. Z O.O.** - IOS DEVELOPER

My days are filled from top to bottom with Xcode, Objective C, UIKit and related technologies. I'm part of the team that is responsible for maintaining and developing a portfolio of clients apps.

01/2013 - 08/2013

**ORBA BALUTA SP. J.** - DEVELOPER

I spent most of my time working on iOS apps, working with libraries such as AFNetworking, Core Data (using MagicalRecord) and ZXing.

Additionally, I've built backends for my apps and sometimes I was also responsible for development of webapps using CakePHP framework for backend, with HTML5/CSS3/jQuery for frontend.

07/2012 - 01/2013

**DCS.PL** - DEVELOPER (RAPID DEVELOPMENT TEAM)

During my time there I started working with iOS - I've learned Obj-C, how to use UIKit, AFNetworking, Core Data and ZBar. The app I've worked on started as an iOS 5.1 project and was later ported to iOS 6.

Earlier during my time at the company I have been building webapps with Django and HTML5/CSS3/jQuery.

02/2012 - 07/2012

**SIXBOX.ES** - WEB DEVELOPER

We've built custom sites for our clients using PHP/Wordpress/HTML5/CSS3/jQuery. We've also taken over many existing projects and rebuilt them from the ground up - with a new visual identity as well as significant changes to the underlying code.

08/2011 - 01/2012

**ANY7** - WEB DEVELOPER

I created a system for conference management - a custom CMS, registration for participants, payments, batch creation of badges, etc. Later I also helped to maintain the internet store at [inmudo.pl](http://inmudo.pl). All our work was done with PHP/PropelORM/Smarty/MySQL for the backend and HTML5/CSS3 and dash of jQuery for the frontend.

## SKILLS

- fluent in English, Polish, communicative in German
- databases (MySQL, MSSQL, PostgreSQL)
- working knowledge of Objective-C, Python, JavaScript, shell-scripting, PHP, git, hg
