

EXPERIENCE

04/2015 — 07/2017

CLUE / BioWINK GMBH — IOS DEVELOPER

I was with the company through an explosive growth phase — our user base grew more than tenfold. We were a small team (up to five iOS engineers), that I helped to recruit and hire. I've played a role in almost everything you can do in the app today; some of the projects I'm proudest of include Clue Connect, our sync architecture and the complex data entry screen.

Lately, I focused more on infrastructure and architecture, helping my teammates be more productive. I introduced Swift to our codebase, expanded our CI infrastructure and automated our release process.

I'm a fan of reactive approach to programming and I was responsible for introducing ReactiveSwift and ReactiveCocoa 5 in our app.

05/2014 — 01/2015

MACOSCOPE — IOS DEVELOPER

I helped with a variety of consulting projects during my time there — from building whole product from scratch, to inheriting and modernising existing codebases. I'm proud of the style guide I've written during my time there. I've also built some internal tools using AppKit and ReactiveCocoa.

11/2013 — 05/2014

CONNECTMEDICA SP. Z O.O. — IOS DEVELOPER

My days were filled from top to bottom with Xcode, Objective C, UIKit and related technologies. I was part of the team that was responsible for maintaining and developing a portfolio of clients apps in the medical industry.

01/2013 — 08/2013

ORBA BALUTA SP. J. — DEVELOPER

I spent most of my time working on iOS apps, working with libraries such as AFNetworking, Core Data (using MagicalRecord) and ZXing.

Additionally, I've built backends for my apps and sometimes I was also responsible for development of webapps using CakePHP framework for backend, with HTML5/CSS3/jQuery for frontend.

07/2012 — 01/2013

DCS.PL — DEVELOPER (RAPID DEVELOPMENT TEAM)

During my time there I started working with iOS — I've learned Obj-C, how to use UIKit, AFNetworking, Core Data and ZBar. The app I've worked on started as an iOS 5.1 project and was later ported to iOS 6.

Earlier during my time at the company I have been building webapps with Django and HTML5/CSS3/jQuery.

SKILLS

- fluency in English, Polish, intermediate knowledge of German
- excellent knowledge of UIKit, Swift, Objective-C, fastlane, git, shell-scripting; working knowledge of Python, JavaScript, PHP
- interest in functional programming, aviation and pop music
